Preface	ix

PART I MEANING BEFORE COMMUNICATION

1. Let's Agree on Terms	3
1.1. Defining semantics with evolution in mind	3
1.2. Health warning about 'concepts'	9
1.3. A scale from no-brainers to cognitive concepts	16
2. Animals Approach Human Cognition	20
2.1. Induction, generalization, and abstraction	22
2.2. Freewill, or at least some metacognition	29
2.3. Object permanence and displaced reference	36
2.4. Biological motion and animacy	41
2.5. Structured conceptual content and transitive inference	45
2.6. Semantic memory, a store of non-linguistic knowledge	49
2.7. Sensory-motor declarative-imperative co-involvement in concepts	60
3. A New Kind of Memory Evolves	65
3.1. Episodic memory in animals: knowledge of the past and future	71
3.2. Episodic memory and Kantian analytic/synthetic	83
4. Animals Form Proto-propositions	88
4.1. The magical number 4—how big is a simple thought?	90
4.2. Predicate-argument structure in animal brains	96
4.3. Local and global attention to objects and scenes	103
4.4. Animal truth, reference and sense	113

5. Towards Human Semantics	123
5.1. A parsimonious <i>Begriffsschrift</i> for proto-propositions	123
5.2. Getting rid of individual constants	128
5.3. Getting rid of ordered arguments and role-markers	140
5.4. One-place predicates over scenes and objects	147
5.5. Armchair ontology of objects, events, and scenes	157

PART II COMMUNICATION: WHAT AND WHY?

6. Communication by Dyadic Acts	167
6.1. Roughly and readily defining 'communication'	167
6.2. Pragmatic origins	170
6.3. Things animals do to each other	177
6.4. Getting the right environmental conditions	185
6.5. From innate to learned	197
7. Going Triadic: Precursors of Reference	205
7.1. Early manipulation of attention	205
7.2. Indexical/deictic pointing	208
7.3. Standardized alarm and food calls	225
7.4. Beyond innate symbols and learned deixis	235
8. Why Communicate? Squaring with Evolutionary Theory	243
8.1. Bridges, bullets, monsters, and niches	244
8.2. Evolutionary theories of altruism and cooperation	252
8.3. Evolutionary theories of selfish communication	277
8.4. (Cultural) group selection	293
9. Cooperation, Fair Play, and Trust in Primates	307
9.1. Mind-reading, a prerequisite for intentional cooperation	307
9.2. Cooperation	313
9.3. Fair play	322
9.4. Trust(-worthiness), groups, faces, and a hormone	325
9.5. Wrapping up	329
10. Epilogue and Prologue	331
Bibliography	335
Index	373
