

**THOMAS W. JACKSON AND
STEVEN LOCKWOOD**

BUSINESS ANALYTICS

A CONTEMPORARY APPROACH

CONTENTS

List of Figures	ix
Foreword	xi
Preface	xiii
Acknowledgments	xvii
About the Authors	xviii
PART I CONTEXT	1
1 Understanding the Big Data Landscape	2
1.1 Introduction	2
1.2 World Wide Web underpins everything we do	2
1.3 The building blocks of big data	4
1.4 Birth of big data and information	8
1.5 Sensors in the network: Internet of Things	9
1.6 Human sensors adding to the data load	13
1.7 Conclusion	16
References	17
2 Analytics: Descriptive, Predictive, Prescriptive and Cognitive	20
2.1 Introduction	20
2.2 So what has changed?	20
2.3 Descriptive analytics	22
2.3.1 Techniques	23
2.4 Predictive analytics	23
2.4.1 Predictive analytics: EMOTIVE case study	24
2.5 Prescriptive analytics	27
2.6 Cognitive computing – understand, reason and learn	29
2.6.1 What are the requirements of a cognitive system?	31
2.6.2 Data ingestion	32
2.6.3 Natural language processing	33
2.6.4 Hypothesis and evidence-based scoring to aid model building	34
2.6.5 Ranking	35
2.7 Conclusion	36
References	37
PART II ARCHITECTURAL CONSIDERATIONS	39
3 Building Analytics Across a Hybrid Cloud	40
3.1 Introduction	40
3.2 Analytical platform	42
3.2.1 Real-time analytics	44

3.2.2	Analytics exploitation platform	45
3.2.3	Information integration and governance	46
3.2.4	Security	46
3.3	What is a hybrid cloud?	47
3.4	So why is a hybrid cloud a good idea?	48
3.4.1	Integration across each cloud environment	50
3.4.2	Workload management	50
3.4.3	Easily moving applications between environments	51
3.4.4	Networking must be optimised	51
3.4.5	Security is paramount	52
3.4.6	Data movement is a challenge	52
3.5	Building the hybrid cloud platform	53
3.6	Managing the hybrid cloud platform	58
3.7	Conclusion	59
	References	61
4	Metadata Management	64
4.1	Introduction	64
4.2	The metadata problem space	64
4.2.1	Sources of metadata	66
4.3	Metadata classification	67
4.3.1	Business metadata	67
4.3.2	Technical metadata	67
4.3.3	Information governance metadata	68
4.3.4	Combining metadata	70
4.3.5	Information virtualisation metadata	72
4.3.6	Collaborative metadata	72
4.3.7	Developing a metadata strategy	72
4.3.8	Bringing it all together	74
4.4	Conclusion	74
	References	76
5	Governance: The Hardest Part?	78
5.1	Introduction	78
5.2	What is information governance?	78
5.3	Issues that may exist in a business with poor governance	79
5.4	Who is involved in Information governance?	80
5.5	What actually needs to be governed: dimensions for information governance	82
5.5.1	Organisation	83
5.5.2	Policies and standards	85
5.5.3	Business process	86
5.5.4	Financial	87
5.5.5	Data quality/data life cycle management and metrics	87
5.5.6	Programmes and projects	88
5.5.7	Tools and technology architecture	89
5.5.8	Control, risk and security	90
5.5.9	Information architecture	91
5.6	Hybrid cloud solutions and impact on information governance	92

5.7	Information governance and regulatory concerns	93
5.8	Conclusion	96
	References	97
PART III PRACTICAL APPLICATION ISSUES		99
6	Utilising the Promise of Open Data	100
6.1	Introduction	100
6.2	Using open data	100
6.2.1	Current issues with open data	101
6.2.2	Data standardisation	101
6.2.3	Data access and data change notification	101
6.2.4	Metadata tagging	102
6.2.5	The benefits of analytics: discovering new linkages in open data	106
6.3	Other issues	106
6.4	Conclusion	107
	References	108
7	Ethics	110
7.1	Introduction	110
7.2	Who is using your data?	111
7.3	Code of ethics	114
7.3.1	Ethical issues	116
7.3.2	Privacy and informed consent in analytics	117
7.3.3	Fair selection of users	117
7.4	The trust economy	118
7.5	The future – thriving in the new landscape	119
7.6	Conclusion	121
	References	122
PART IV FUTURE DIRECTIONS		125
8	What Lies Ahead	126
8.1	Introduction	126
8.2	Understanding the link between mental health and big data	127
8.3	Detecting emotions	129
8.3.1	How will emotions be used?	129
8.4	Improving cancer care through social media	130
8.5	Quantum analytics	131
8.5.1	Quantum analytics development	132
8.6	Neuromorphic chips	134
8.7	AI – job reduction?	135
8.8	Conclusion	135
	References	136
	Appendix 1: Big Data Analytics Platform – Additional Components	139
	Appendix 2: Graph Databases	144
	Appendix 3: Open Standards	147
	Glossary	149
	Index	155
