

# Understanding Development Economics

Its challenge to development  
studies

**Adam Fforde**

# Contents

<i>List of abbreviations</i>	xv
<i>Preface</i>	xvii

## **PART I**

### **Development economics: theory and its application 1**

#### **1 Ways to cope with development economics 3**

*Development as an issue: globalization and underdevelopment 4*

*Action and actors: the developers and what they do 8*

*The problem of development 10*

*Development economics and doing development 13*

*Conclusions 16*

*Questions for discussion 17*

#### **2 Evidence and positions: development economics and its facts 19**

*The empirics of development 19*

*Development economists' unstable views 21*

*The authority of an economic position 23*

*Is knowability a necessary assumption? 27*

*Conclusions 31*

*Questions for discussion 32*

#### **3 Interdisciplinary boundaries: the limits of economics 34**

*"Universalism" and knowledge compartmentalization 34*

*For economists, why development economics? 36*

*The influence of context: an example 40*

*Conclusions 43*

*Questions for discussion 43*

x	<i>Contents</i>	
4	<b>How DE categorizes development: internal definitions</b>	45
	<i>The central issue</i>	45
	<i>The relationship between economic growth and development</i>	47
	<i>Macroeconomics: year-by-year changes in levels of GDP per capita</i>	57
	<i>Conclusions</i>	62
	<i>Questions for discussion</i>	62
5	<b>Toward better management of understandings: internal and external critiques of mainstream development economics</b>	65
	<i>An internal critique: coping with the contingent— a case study</i>	66
	<i>Assessments of economists' explanations: epistemologies and empirics</i>	70
	<i>Conclusions</i>	81
	<i>Questions for discussion</i>	82
6	<b>Coping with facts: how mainstream economists decide on what is worth modeling</b>	84
	<i>Economics as rhetoric</i>	85
	<i>The sociology of economists</i>	89
	<i>Changes in economists' interests and the cutting edge</i>	92
	<i>Conclusions</i>	94
	<i>Questions for discussion</i>	95
7	<b>Established theories of economic growth: standard theories and implications for policy and practice, Part 1</b>	97
	<i>Growth models: overview</i>	97
	<i>Review of NIA</i>	98
	<i>Production functions</i>	100
	<i>What is a model?</i>	101
	<i>The Harrod–Domar model</i>	102
	<i>Solow model</i>	106
	<i>Conclusions</i>	109
	<i>Questions for discussion</i>	110
8	<b>Established theories of economic growth: standard theories and implications for policy and practice, Part 2</b>	112
	<i>Human capital and growth</i>	113
	<i>What is meant by technical progress in endogenous growth models?</i>	114

	<i>Externalities, technical progress, and growth</i>	116
	<i>Total factor productivity</i>	118
	<i>Total factor productivity and the East Asian miracle</i>	120
	<i>Conclusions</i>	121
	<i>Questions for discussion</i>	122
<b>9</b>	<b>Microfoundations</b>	<b>124</b>
	<i>Background of microeconomics</i>	128
	<i>Microeconomics and market failure</i>	131
	<i>Markets and the failure of standard analytical methodology</i>	137
	<i>Conclusions</i>	140
	<i>Questions for discussion</i>	141
<b>10</b>	<b>Contemporary internal radicalism: the Washington Consensus and after</b>	<b>143</b>
	<i>The mainstream and the Washington Consensus: continuities</i>	144
	<i>The Washington Consensus</i>	147
	<i>The post-Washington Consensus</i>	149
	<i>Conclusions</i>	154
	<i>Questions for discussion</i>	154
<b>11</b>	<b>Alternative economic theories</b>	<b>156</b>
	<i>Development economics and critique</i>	158
	<i>Commoditization and ignorance: linking economics to critique</i>	159
	<i>Beliefs about the nature of reality</i>	160
	<i>Neo-institutional economics</i>	162
	<i>Interpretations of perfect competition</i>	164
	<i>Debates about the importance of realism in theoretical assumptions</i>	166
	<i>Conclusions</i>	167
	<i>Questions for discussion</i>	169
<b>12</b>	<b>Other visions of the developing economy: uneven growth and exclusion</b>	<b>171</b>
	<i>Exclusion as more than poverty</i>	172
	<i>Mainstream development economics: the rural and the urban</i>	175
	<i>Rural–urban migration and the Harris and Todaro model</i>	180
	<i>Conclusions</i>	182
	<i>Questions for discussion</i>	183
