<i>Preface</i>	vii
PART I: THE THEORY OF THE MINING FIRM	1
Introduction to Part I	2
Essay 1    Toward a more general theory of the mining firm <i>M.C. Kemp and N.V. Long</i>	5
Essay 2    The firm as resource-farmer <i>M.C. Kemp and N.V. Long</i>	19
Essay 3    On the optimal order of exploitation of deposits of an exhaustible resource <i>M.C. Kemp and N.V. Long</i>	31
PART II: AGGREGATIVE MODELS OF A CLOSED ECONOMY	41
Introduction to Part II	42
Essay 4    The optimal consumption of depletable resources <i>M.C. Kemp and N.V. Long</i>	45
Essay 5    Eating a cake of unknown size: pure competition ver- sus social planning <i>M.C. Kemp and N.V. Long</i>	55

Essay 6	The management of a renewable resource: Monopoly versus competition <i>M.C. Kemp and N.V. Long</i>	71
Essay 7	Optimal depletion of a nonrenewable resources when technical progress is endogenous <i>C. Chiarella</i>	81
Essay 8	Optimal technical progress with exhaustible resources <i>A. Takayama</i>	95
Essay 9	The underexploitation of natural resources: A model with overlapping generations <i>M.C. Kemp and N.V. Long</i>	111
Essay 10	Resource extraction under conditions of common access <i>M.C. Kemp and N.V. Long</i>	127
Essay 11	The optimal depletion of an exhaustible resource in a two-sector model <i>C. Chiarella</i>	137
Essay 12	Optimal search and extraction: A general-equilibrium formulation <i>M.C. Kemp and N.V. Long</i>	155
PART III: INTERNATIONAL TRADE WITH EXHAUSTIBLE RESOURCES		165
Introduction to Part III		166
Essay 13	International trade with an exhaustible resource: A theorem of Rybczynski type <i>M.C. Kemp and N.V. Long</i>	169
Essay 14	Exhaustible resources and the Stolper–Samuelson–Rybczynski theorems <i>M.C. Kemp and N.V. Long</i>	179

Essay 15	Exhaustible resources and the Heckscher–Ohlin theorem <i>M.C. Kemp and N.V. Long</i>	183
Essay 16	Optimal tariffs and exhaustible resources <i>M.C. Kemp and N.V. Long</i>	187
Essay 17	The interaction of resource-rich and resource-poor economies <i>M.C. Kemp and N.V. Long</i>	197
Essay 18	International monopoly–monopsony power over exhaustible resources <i>M.C. Kemp and N.V. Long</i>	211
Essay 19	Trade between resource-poor and resource-rich economies as a differential game <i>C. Chiarella</i>	219
Appendix	A modest defence of the use of Cobb–Douglas production functions in the analysis of exhaustible resources <i>M.C. Kemp and N.V. Long</i>	247
