

# Contents

1 Introduction . . . . .	1
A Reader's Guide. . . . .	3

## **The Simen, a Unique Afroalpine Community**

2 The Simen Mountains: Geography and Climate of the Study Area. . .	7
3 The Vegetation in the Simen Mountains and Human Utilization of the Area . . . . .	15
4 The Walia Ibex. . . . .	28
4.1 The Walia Ibex: Its Taxonomy and Morphological Characteristics; Age Classes and Horn Growth. . . . .	28
4.2 When in the History of the Climate Could the Ibex, as a Palaearctic Animal, Have Invaded the Range of the Simen Mountains? . . .	33
4.3 The Reproductive Cycle of the Walia Ibex and the General Grouping Pattern . . . . .	35
5 Two Possible Competitors of the Walia Ibex: the Klipspringer and the Gelada Baboon. . . . .	39
6 Further Mammals and Birds Living in the Simen Mountains . . . . .	44

## **Methods, Techniques and Population Estimates**

7 Methods of Obtaining Data and Field Techniques. . . . .	53
7.1 Observation and Recording of Animals . . . . .	53
7.2 Optimal Time of Day for Spotting Animals and Duration of the Observations . . . . .	61
7.3 The Grid Pattern System Within the Main Study Area . . . . .	62
7.4 How Comparable and Representative Are Observations Carried Out from the Selected Fixed Observation Points? . . . . .	63
7.5 Techniques Applied to Investigate Feeding Behaviour of Walia Ibex, Klipspringer and Gelada Baboon. . . . .	65

8	Methods for the Analysis of Data on Habitat Selection of the Included Species . . . . .	67
8.1	The Variables Used in the Analysis of Data . . . . .	67
8.2	The Procedure in Applying the Stepwise Multiple Regression . . . . .	69
8.3	Assumptions for Regression Analysis . . . . .	70
8.4	Transformation of the Main Dependent Variable . . . . .	70
8.5	Relations Between the Environmental Factors . . . . .	71
8.6	Transformation of the Independent Variables . . . . .	72
8.7	Inherent Imperfections in the Data Being Able to Diminish the Multiple Correlation Coefficient and a Test to Detect Possible but Overlooked Influential Environmental Factors . . . . .	74
9	Estimates of Population Size and Changes of the Walia Ibex . . . . .	77
 <b>The Niche and Habitat of the Walia Ibex, the Klipspringer and the Gelada Baboon</b>		
10	The Habitat Selection of the Walia Ibex, the Klipspringer and the Gelada Baboon According to the Frequencies of Their Visits to the Hectare Fields . . . . .	85
11	The Habitat Selection of the Walia Ibex, the Klipspringer and the Gelada Baboon with Regard to Particular Environmental Factors . . . . .	92
11.1	The Gradient of the Slope . . . . .	92
11.2	The Compass Direction of the Slope with Daily and Seasonal Effect . . . . .	94
11.3	The Altitude and the Vegetation Over the Seasons . . . . .	97
11.4	The Relief, the Weather and the Activity . . . . .	99
11.5	Relationship Between the Gradient, the Vegetation and the Group Size in the Walia Ibex, the Klipspringer and the Gelada Baboon . . . . .	102
11.6	Observation Success at Muchila Afaf-, Kedadit- and Saha-Observation Points . . . . .	106
11.7	Conclusions, Comparisons with the Alpine Ibex and Considerations on a Possible Tradition . . . . .	108
12	Separation in the Habitat of the Walia Ibex, the Klipspringer, the Gelada Baboon, the Bushbuck, the Colobus Monkey, the Simen Fox and the Golden Jackal. . . . .	111
13	The Plot of the Residuals of the Regression Equation – a Test for Detecting Overlooked, but Decisive Independent Variables . . . . .	121
14	The Theoretical Distribution Pattern of the Walia Ibex and the Klipspringer Within the Study Area . . . . .	124
	Summary to Chapters 10 to 14 . . . . .	132

## **The Social System of the Walia Ibex**

15 Towards the Social System of the Walia Ibex: Approach, Inferences and Predictions. . . . .	137
15.1 The Approach . . . . .	137
15.2 Inferred Behaviour of Distinct Ibex Classes . . . . .	138
15.3 Predictions Deduced from the Inferred Behaviour of the Sex-Age Classes . . . . .	143
16 The Social System of the Walia Ibex; Evidence for and Tests of the Above Predictions . . . . .	146
16.1 Habitat Preference of Males and Females of the Walia Ibex; Tests of the Predictions 1 to 3 . . . . .	146
16.2 Size of Home Ranges; Test of Prediction 4. . . . .	150
16.3 The Dominant Males Only as Occasional Visitors in Female-Young Groups; Test of Prediction 5 . . . . .	152
16.4 The Rank Order and the Fights Between Walias of Different Classes; Test of Prediction 6. . . . .	152
16.5 The Marching Order Within the Mixed Groups; Test of Prediction 7 . . . . .	154
16.6 Food Selection of the Walia Ibex of Different Classes and of the Klipspringer with Considerations on Prediction 9. . . . .	157
16.7 Conclusions and Comparisons with the Situation in the Alpine Ibex . . . . .	167
Summary to Chapters 15 and 16. . . . .	169

## **Conservational Outlook**

17 The Simen, an Ecosystem in Danger. . . . .	173
