

Contributors	•	vii
Preface	•	xi

1. Introduction to Plasmids: a Selective View of Their History	•	1
<i>Donald R. Helinski</i>		

I. Plasmid Replication Systems

2. Participating Elements in the Replication of Iteron-Containing Plasmids	•	25
<i>Ricardo Krüger, Sheryl A. Rakowski, and Marcin Filutowicz</i>		

3. Plasmid Replication Control by Antisense RNAs	•	47
<i>Sabine Brantl</i>		

4. Rolling-Circle Replication	•	63
<i>Saleem A. Khan</i>		

II. Plasmid Maintenance and Inheritance

5. Partition Systems of Bacterial Plasmids	•	81
<i>Barbara E. Funnell and Roderick A. Slavcev</i>		

6. Genetic Addiction: a Principle of Gene Symbiosis in a Genome	•	105
<i>Ichizo Kobayashi</i>		

7. DNA Site-Specific Resolution Systems	•	145
<i>Bernard Hallet, Virginie Vanhooff, and François Cornet</i>		

8. Topological Behavior of Plasmid DNA	•	181
<i>N. Patrick Higgins and Alexander V. Vologodskii</i>		

9. Bacterial Conjugation in Gram-Negative Bacteria • 203

*Trevor Lawley, Brian M. Wilkins,
and Laura S. Frost*

10. Conjugation in Gram-Positive Bacteria • 227

Don B. Clewell and M. Victoria Francia

III. Specific Plasmid Systems

11. Plasmid Strategies for Broad-Host-Range Replication in Gram-Negative Bacteria

• 259

Aresa Toukdarian

12. The Symbiotic Plasmids of the *Rhizobiaceae*

• 271

David Romero and Susana Brom

13. Linear Plasmids in Bacteria: Common Origins, Uncommon Ends • 291

Philip Stewart, Patricia A. Rosa, and Kit Tilly

14. The 2 μ m Plasmid of *Saccharomyces cerevisiae* • 303

*Makkuni Jayaram, XianMei Yang, Shwetal Mehta,
Yuri Voziyanov, and Soundarapandian Velmurugan*

15. Viral Plasmids in Mammalian Cells

• 325

Lori Frappier

16. Degradative Plasmids • 341

*Naoto Ogawa, Ananda M. Chakrabarty,
and Olga Zaborina*

17. Archaeal Plasmids • 377

*Roger A. Garrett, Peter Redder, Bo Greve,
Kim Brügger, Lanming Chen, and Qunxin She*

IV. Virulence and Antibiotic Resistance Plasmids

18. Genome-Scale Analysis of Virulence Plasmids: the Contribution of Plasmid-Borne Virulence Genes to Enterobacterial Pathogenesis • 395

Malabi M. Venkatesan and Valerie Burland

19. Virulence Plasmids of Spore-Forming Bacteria • 413

Julian I. Rood

20. Virulence Plasmids of *Yersinia*: Characteristics and Comparison • 423

Luther E. Lindler

21. Virulence Plasmids of Nonsporulating Gram-Positive Pathogens • 439

Chris M. Pillar and Michael S. Gilmore

22. The *Agrobacterium* Ti Plasmids • 455

Peter J. Christie

23. Antibiotic Resistance Plasmids • 473

Diane E. Taylor, Amera Gibreel, Trevor D. Lawley, and Dobryan M. Tracz

24. Plasmids pJM1 and pColV-K30 Harbor Iron Uptake Genes That Are Essential for Bacterial Virulence • 493

Jorge H. Crosa

V. Plasmid Ecology and Evolution

25. Evolution and Population Genetics of
Bacterial Plasmids • 509

Christopher M. Thomas

26. Second Chromosomes and Megaplasms in
Bacteria • 529

*Shawn R. MacLellan, Christopher D. Sibley,
and Turlough M. Finan*

VI. Plasmids as Genetic Tools

27. Plasmid Vectors for Gene Cloning and
Expression • 545

Quinn Lu

28. Plasmids as Genetic Tools for Study of
Bacterial Gene Function • 567

Gregory J. Phillips

29. Plasmids as Tools for Containment
• 589

Begoña Torres, José L. García, and Eduardo Díaz

- Index • 603
