

Table of Contents

| | |
|--|-----|
| Preface | v |
| 1 Laboratory Safety | 1 |
| 1.1 The lab as a safe place | 1 |
| 1.2 Personal protective equipment | 5 |
| 1.3 Emergency equipment for general purpose | 7 |
| 1.4 GHS for classification and labeling of chemicals | 12 |
| 1.5 Chemical incompatibility and storage | 18 |
| 1.6 Substances with risk of fire and explosion | 20 |
| 1.7 Waste treatment and disposal | 25 |
| 1.8 References | 28 |
| 2 Lab Notebook | 29 |
| 2.1 Notebook structure | 29 |
| 2.2 Experiment report for a practice course | 33 |
| 2.3 Some guidelines for keeping a notebook | 33 |
| 2.4 Example of an experiment description | 36 |
| 2.5 Basic calculations | 40 |
| 3 Laboratory Equipment | 45 |
| 3.1 Introduction | 45 |
| 3.2 Manufacture of lab equipment | 45 |
| 3.3 Cleaning of glassware | 48 |
| 3.4 General-purpose glassware | 53 |
| 3.5 Fastening and anchoring | 60 |
| 3.6 Pressure and vacuum equipment | 63 |
| 3.7 Pressure reactors and hydrogenators | 67 |
| 3.8 Other materials | 68 |
| 4 Basic Laboratory Operations | 71 |
| 4.1 Introduction | 71 |
| 4.2 Weighing of solids and liquids | 71 |
| 4.3 Measurement of liquid volumes or solutions | 74 |
| 4.4 Transfer of solids and liquids | 79 |
| 4.5 Techniques used in chemical reactions | 80 |
| 4.6 Reflux | 89 |
| 4.7 Isolation and purification of solids | 100 |
| 4.8 Liquid-liquid extraction | 111 |
| 4.9 Solid-liquid extraction (Soxhlet) | 116 |
| 4.10 Removal of solvents under reduced pressure | 117 |
| 4.11 Distillation | 120 |
| 4.12 Reactions in an inert atmosphere | 130 |
| 4.13 Reaction and removing of gaseous products | 135 |

| | | |
|------|---|-----|
| 4.14 | Chromatographic techniques | 135 |
| 4.15 | References | 144 |
| 5 | Determining Physical and Spectroscopic Properties | 145 |
| 5.1 | Introduction | 145 |
| 5.2 | Determining physical properties | 145 |
| 5.3 | Determining spectroscopic properties | 152 |
| 5.4 | Preparation of samples for spectroscopy | 171 |
| 6 | Functional-Group Analysis | 177 |
| 6.1 | Introduction | 177 |
| 6.2 | Qualitative elemental analysis | 177 |
| 6.3 | Organoleptic and physical properties | 180 |
| 6.4 | Classification by solubility (solubility tests) | 180 |
| 6.5 | Functional-group analysis | 181 |
| 6.6 | Identification of an unknown substance | 205 |
| 7 | Basic Operation Experiments | 207 |
| 7.1 | Recrystallization and solubility tests | 208 |
| 7.2 | Stirring and decanting | 213 |
| 7.3 | Simple distillation | 216 |
| 7.4 | Extraction and "rotary evaporator" | 218 |
| 7.5 | Liquid-liquid extraction (with centrifuge) | 220 |
| 7.6 | Liquid-liquid extraction (with separatory funnel) | 222 |
| 7.7 | Reflux, simple, and fractional distillation | 227 |
| 7.8 | Steam distillation and vacuum distillation | 230 |
| 7.9 | Solid-liquid extraction (Soxhlet) | 232 |
| 7.10 | TLC and CC chromatography | 234 |
| 7.11 | References | 238 |
| 8 | Organic Synthesis Experiments | 239 |
| 8.1 | Alkene oxidation | 240 |
| 8.2 | Dehydration of alcohols | 242 |
| 8.3 | Oxidation of alcohols | 244 |
| 8.4 | Nucleophilic substitution reactions | 246 |
| 8.5 | Synthesis of an ether | 250 |
| 8.6 | Aromatic electrophilic substitution of an ester | 252 |
| 8.7 | Electrophilic aromatic substitution (S_EAr) | 254 |
| 8.8 | Synthesis of azo dyes | 256 |
| 8.9 | Auto-oxidation-reduction of aromatic aldehydes | 259 |
| 8.10 | Synthesis of α, β -unsaturated ketones | 262 |
| 8.11 | Saponification reaction | 265 |
| 8.12 | Esterification | 267 |
| 8.13 | Difunctional compound chemoselectivity | 269 |
| 8.14 | Perkin reaction | 272 |
| 8.15 | Synthesis of imide | 274 |
| 8.16 | Condensation polymerization reaction | 276 |
| 8.17 | Radical polymerization | 278 |
| 8.18 | Multistep synthesis of a drug | 280 |
| 8.19 | Multistep synthesis of an anesthetic | 283 |

| | | |
|-------|---|-----|
| 8.20 | Using protecting groups | 286 |
| 8.21 | References | 289 |
| 9 | Advanced Organic Synthesis Experiments | 291 |
| 9.1 | Reductive amination | 292 |
| 9.2 | Chiral resolution | 294 |
| 9.3 | Stereospecific synthesis of glycols | 297 |
| 9.4 | Reactivity of carbenes | 300 |
| 9.5 | Regioselective halogenations | 302 |
| 9.6 | Oxidative coupling of alkynes | 304 |
| 9.7 | Diels-Alder reactions | 306 |
| 9.8 | Wittig reaction | 308 |
| 9.9 | Grignard reagents | 311 |
| 9.10 | Organometallic compounds | 314 |
| 9.11 | Chemoselectivity | 317 |
| 9.12 | Electrophilic aromatic substitution (S_EAr) | 320 |
| 9.13 | Hofmann rearrangement | 323 |
| 9.14 | Radical coupling | 325 |
| 9.15 | Synthesis of a heterocyclic drug | 328 |
| 9.16 | Transformations of hydroxy ketone | 331 |
| 9.17 | Enamines as reaction intermediates | 334 |
| 9.18 | N-Heterocycle synthesis | 336 |
| 9.19 | Synthesis of macrocycles | 338 |
| 9.20 | Preparation of a sports dietary supplement | 340 |
| 9.21 | Claisen condensation | 342 |
| 9.22 | Terpene transformation | 344 |
| 9.23 | Carbohydrates | 346 |
| 9.24 | Preparation of a nucleoside | 348 |
| 9.25 | References | 351 |
| 10 | Microscale | 353 |
| 10.1 | Introduction | 353 |
| 10.2 | The scales in the Organic Chemistry laboratory | 353 |
| 10.3 | Pros of working at the microscale | 355 |
| 10.4 | Specific microscale lab equipment | 355 |
| 10.5 | Microscale laboratory techniques | 357 |
| 10.6 | References | 370 |
| 11 | Microscale Experiments | 371 |
| 11.1 | Addition of HX to alkenes | 372 |
| 11.2 | Production of margarine | 374 |
| 11.3 | Isomerization of alkenes | 376 |
| 11.4 | Nucleophilic substitution reaction | 378 |
| 11.5 | Methylketone reactivity | 380 |
| 11.6 | Electrophilic aromatic substitution (S_EAr) | 382 |
| 11.7 | Sandmeyer reaction | 385 |
| 11.8 | Synthesis of a carbohydrate derivative | 387 |
| 11.9 | Free-radical halogenation | 389 |
| 11.10 | Alkylbenzene oxidation | 391 |

| | | |
|-------|--|-----|
| 11.11 | Reduction of anthraquinone | 393 |
| 11.12 | Compounds for the fragrance industry | 395 |
| 11.13 | Tandem transesterification-esterification | 399 |
| 11.14 | Polyfunctional molecule reactivity | 401 |
| 11.15 | Multistep synthesis of N-heterocycles | 404 |
| 11.16 | Synthesis of five-membered heterocycles | 406 |
| 11.17 | References | 408 |
| 12 | Green Chemistry | 409 |
| 12.1 | Introduction | 409 |
| 12.2 | The 12 principles of Green Chemistry | 410 |
| 12.3 | Goals of Green Chemistry | 412 |
| 12.4 | Parameters to evaluate chemical processes | 412 |
| 12.5 | Green Chemistry for undergraduate laboratories | 414 |
| 12.6 | References | 414 |
| 13 | Green Chemistry Experiments | 417 |
| 13.1 | Oxidative cleavage of alkenes | 418 |
| 13.2 | Halogen addition to alkenes | 421 |
| 13.3 | Green epoxidation | 423 |
| 13.4 | Acylation of aromatic amines | 425 |
| 13.5 | Solvent-free reductive amination | 427 |
| 13.6 | Friedel-Crafts alkylation | 429 |
| 13.7 | Regiospecific nitration of phenols | 431 |
| 13.8 | Oxidation of aromatic aldehydes | 433 |
| 13.9 | Green synthesis of ethers | 435 |
| 13.10 | Synthesis of an acetal in water | 437 |
| 13.11 | Reduction of a ketone alkaline solution | 439 |
| 13.12 | Solvent-free Baeyer-Villiger reaction | 441 |
| 13.13 | Enzymatic reduction of β -ketoesters | 443 |
| 13.14 | C-C Bond forming | 445 |
| 13.15 | C=C Bond formation in the absence of solvent | 447 |
| 13.16 | Diels-Alder in water | 449 |
| 13.17 | Green synthesis of a <i>p</i> -cymene | 451 |
| 13.18 | Oxidative coupling reaction in water | 454 |
| 13.19 | Organic compounds from recycled polymer | 456 |
| 13.20 | Crosslinked biodegradable polymers | 459 |
| 13.21 | Polymers from renewable raw materials | 461 |
| 13.22 | Organocatalysis | 463 |
| 13.23 | Knoevenagel-Pinner reactions in water | 466 |
| 13.24 | Biginelli reaction | 468 |
| 13.25 | Multi-component synthesis in water | 470 |
| 13.26 | Preparation of a dipyrrol derivative in water | 472 |
| 13.27 | Ionic liquid in water | 474 |
| 13.28 | Beckmann rearrangement | 476 |
| 13.29 | Fluorescent natural product | 479 |
| 13.30 | Photochemical solid phase | 481 |
| 13.31 | References | 483 |
| | Index | 485 |
