

TABLE OF CONTENTS

List of Authors	IX
GENERAL INTRODUCTION <i>Robert Franck</i>	1
PART I STATISTICAL MODELLING AND THE NEED FOR THEORY	
Introduction to Part I <i>Robert Franck</i>	11
Chapter 1 The determinants of infant mortality: how far are conceptual frameworks really modelled ? <i>Godelieve Masuy-Stroobant</i>	15
Chapter 2 The role of statistical and formal techniques in experimental psychology <i>Guy Lories</i>	31
Chapter 3 Explanatory models in suicide research : explaining relationships <i>Anne-Marie Aish - Van Vaerenbergh</i>	51
Chapter 4 Attitudes towards ethnic minorities and and support for ethnic discrimination, A test of complementary models <i>Peer Scheepers, Geneviève Verberk, Albert Felling</i>	67
Conclusions of Part I <i>Robert Franck</i>	87

PART II COMPUTER SIMULATION AND THE REVERSE ENGINEERING METHOD

Introduction to Part II	103
<i>Robert Franck</i>	

Chapter 5 Computer simulation methods to model macroeconomics	105
<i>Armand de Callatay</i>	

Chapter 6 The explanatory power of Artificial Neural Networks	127
<i>Michel Verleysen</i>	

Conclusions of Part II	141
<i>Robert Franck</i>	

PART III MODELS AND THEORY

Introduction to Part III	149
<i>Robert Franck</i>	

Chapter 7 On modelling in human geography	151
<i>Dominique Peeters</i>	

Chapter 8 The explanatory power of migration models	165
<i>Marc Termote</i>	

Chapter 9 The role of models in comparative politics	181
<i>Christine Mironesco</i>	

Chapter 10 Elementary mathematical modelization of games and sports	197
<i>Pierre Parlebas</i>	

Conclusions of Part III	229
<i>Robert Franck</i>	

PART IV EPISTEMOLOGICAL LANDMARKS

Introduction to Part IV	243
<i>Robert Franck</i>	

Chapter 11	Computer modelling of theory, explanation for the 21st century	245
	<i>Thomas K.Burch</i>	
Chapter 12	The logicist analysis of explanatory theories in archæology	267
	<i>Jean-Claude Gardin</i>	
	Conclusions of Part IV	285
	<i>Robert Franck</i>	
	GENERAL CONCLUSION	295
	<i>Robert Franck</i>	
	Subject index	301
	Name index	305
