

Contents

B. HÖLLDOBLER:
Karl von Frisch and the beginning of experimental behavioral ecology 1

M. LINDAUER:
Personal recollections of Karl von Frisch 5

I. Orientation, Learning, Foraging

R. WEHNER, S. ROSSEL:
The bee’s celestial compass: A case study in behavioural neurobiology 11

R. MENZEL:
Learning in honey bees in an ecological and behavioral context 55

T. D. SEELEY:
The information-center strategy of honeybee foraging 75

N. R. FRANKS:
Reproduction, foraging efficiency and worker polymorphism in army ants 81

J. CHEVERTON, A. KACELNIK, J. R. KREBS:
Optimal foraging: constraints and currencies 109

II. The Analysis of Communication Signals

M. LINDAUER:
The dance language of honeybees: the history of a discovery 129

J. L. GOULD, F. C. DYER, W. F. TOWNE:
Recent progress in the study of the dance language 141

H. MARKL:
Manipulation, modulation, information, cognition: some of the riddles of communication 163

H. SCHEICH:
Auditory brain organization of birds and its constraints for the design of vocal repertoires 195

P. MARLER:
Representational vocal signals in primates 211

III. Communication and Reproductive Behavior

F. RUTTNER:
Reproductive behavior in honeybees 225

B. HÖLLDOBLER, ST. H. BARTZ:
Sociobiology of reproduction in ants 237

P. F. RÖSELER:
Endocrine basis of dominance and reproduction in polistine paper wasps 259

J. BRADBURY:
Contrasts between insects and vertebrates in the evolution of male display, female choice, and lek mating 273

IV. Social Organization

C. D. MICHENER:	
From solitary to eusocial: need there be a series of intervening species?	293
E. O. WILSON:	
The principles of caste evolution	307
B. L. THORNE:	
Termite polygyny: the ecological dynamics of queen mutualism.	325
H. H. W. VELTHUIS:	
The honeybee queen and social organization of her colony	343
ST. T. EMLEN, S. L. VEHRENCAMP:	
Cooperative breeding strategies among birds	359
CH. VOGEL:	
Helping, cooperation, and altruism in primate societies	375

V. Physiology and Societies

B. HEINRICH:	
The social physiology of temperature regulation in honeybees	393
J. BEETSMA:	
Feeding behavior of nurse bees, larval food composition and caste differentiation in the honey bee (<i>Apis mellifera</i>).	407
K. E. LINSSENMAIR:	
Individual and family recognition in subsocial arthropods, in particular in the desert isopod <i>Hemilepistus reaumuri</i>	411
P. W. SHERMAN, W. G. HOLMES:	
Kin recognition: issues and evidence	437
D. v. HOLST:	
Coping behavior and stress physiology in male tree shrews (<i>Tupaia belangeri</i>) . . .	461

Epilogue

D. R. GRIFFIN:	
The cognitive dimensions of animal communication	471
Subject index	483
