

# Contents

## Part I Frege

<b>Frege on Mathematical Progress . . . . .</b>	<b>3</b>
Patricia Blanchette	
<b>Identity in Frege’s Shadow . . . . .</b>	<b>21</b>
Jaakko Hintikka	
<b>Frege and the Aristotelian Model of Science. . . . .</b>	<b>31</b>
Danielle Macbeth	
<b>On the Nature, Status, and Proof of Hume’s Principle in Frege’s Logician Project. . . . .</b>	<b>49</b>
Matthias Schirn	

## Part II Russell

<b>A Study in Deflated Acquaintance Knowledge: Sense-Datum Theory and Perceptual Constancy . . . . .</b>	<b>99</b>
Derek H. Brown	
<b>Whitehead Versus Russell . . . . .</b>	<b>127</b>
Gregory Landini	
<b>The Place of Vagueness in Russell’s Philosophical Development . . . . .</b>	<b>161</b>
James Levine	
<b>Propositional Logic from <i>The Principles of Mathematics</i> to <i>Principia Mathematica</i> . . . . .</b>	<b>213</b>
Bernard Linsky	

### Part III Wittgenstein

<b>Later Wittgenstein on the Logician Definition of Number. . . . .</b>	<b>233</b>
Sorin Bangu	

<b>Wittgenstein's Color Exclusion and Johnson's Determinable. . . . .</b>	<b>257</b>
Sébastien Gandon	

<b>The Concept of "Essential" General Validity in Wittgenstein's <i>Tractatus</i>. . . . .</b>	<b>283</b>
Brice Halimi	

<b><i>Reconstructing a Logic from Tractatus: Wittgenstein's Variables and Formulae</i> . . . . .</b>	<b>301</b>
David Fisher and Charles McCarty	

<b>Justifying Knowledge Claims After the Private Language Argument. . . . .</b>	<b>325</b>
Gheorghe Ștefanov	

### Part IV Carnap

<b>Carnap, Logicism, and Ontological Commitment . . . . .</b>	<b>337</b>
Otávio Bueno	

<b>Frege the Carnapian and Carnap the Fregean . . . . .</b>	<b>353</b>
Gregory Lavers	

<b>On the Interconnections Between Carnap, Kuhn, and Structuralist Philosophy of Science . . . . .</b>	<b>375</b>
Thomas Meier	

### Part V Various Echoes

<b>Abstraction and Epistemic Economy . . . . .</b>	<b>387</b>
Marco Panza	

<b>Torn by Reason: Łukasiewicz on the Principle of Contradiction . . . . .</b>	<b>429</b>
Graham Priest	

<b>Why Did Weyl Think that Dedekind's Norm of Belief in Mathematics is Perverse? . . . . .</b>	<b>445</b>
Iulian D. Toader	

<b>Index . . . . .</b>	<b>453</b>
