CONTENTS

Preface ..... **xi**

1 Variation **1**
1.1 Variation 1
1.2 Airport Immigration 1
1.3 Debt Recovery 2
1.4 Timber Mill Accidents 3
1.5 Budget Deviations 4
1.6 Red Beads Experiment 4
1.7 Some Conclusions 12
1.8 Chapter Summary 13
1.9 Exercises 13

2 Problem Solving **15**
2.1 A Scientific Approach to Problem Solving 15
2.2 The Need for Data 16
2.3 Deciding What to Measure 17
2.4 Collecting Data 18
2.5 Flowcharts and Identifying Causes 19
2.6 Case Study: Debt Recovery Project 21
2.7 Chapter Summary 26
2.8 Exercises 26

3 Looking at Data **29**
3.1 Types of Data 29
3.2 Presentation of Data 31
3.3 Rounding Data 32
3.4 Effective Tables 33
3.5 Graphs 33

John, J. A.
Statistical thinking in business

digitalisiert durch:
IDS Luzern

3.6 Bar Charts 34
3.7 Pareto Diagrams 36
3.8 Stem and Leaf Plots 39
3.9 Box Plots 42
3.10 Histograms 45
3.11 Cumulative Frequency Plots 47
3.12 Run Charts 49
3.13 Scatterplots 50
3.14 Stratification 52
3.15 Case Study: Aerofoil Effectiveness 55
3.16 Chapter Summary 58
3.17 Exercises 58

4 Modelling Data 67
4.1 Introduction 67
4.2 Distributions 70
4.3 Arithmetic Mean 71
4.4 Standard Deviation 72
4.5 Calculating the Mean and Standard Deviation 75
4.6 Interpreting the Standard Deviation 76
4.7 Summary Statistics 78
4.8 Distribution Shapes 80
4.9 The Normal Distribution 83
4.10 Case Study: Julia's Diner 90
4.11 Binary Data 92
4.12 Working with Proportions 93
4.13 Working with Counts 97
4.14 Case Study: Inter-Island Airways 100
4.15 Chapter Summary 101
4.16 Exercises 102

5 Attribute Data 107
5.1 Analysing Attribute Data 107
5.2 Comparing Occurrences between Categories 110
5.3 Excel Demonstration 114
5.4 Analysing a Two-Way Table 116
5.5 Looking at Margins 119
5.6 Case Study: Charnwood Casting Company 121
5.7 Case Study: Arcas Appliance Company 122
5.8 Chapter Summary 125
5.9 Exercises 125

6 Sampling 131
6.1 Collecting Data 131
6.2 Sampling 133

6.3 Sampling Concepts 134
6.4 Wood Experiment 135
6.5 Random Sampling 141
6.6 Nonrandom Sampling 144
6.7 The Accuracy of Sample Estimates 146
6.8 Chapter Summary 147
6.9 Data for the Wood Experiment 147
6.10 Exercises 147

7 Estimation 153
7.1 Sampling Error 153
7.2 Estimating a Mean 155
7.3 Margin of Error for a Mean 159
7.4 Interpreting the Margin of Error 161
7.5 Sample Size for Means 163
7.6 Unknown Population Standard Deviation 164
7.7 Finite Populations 167
7.8 What Affects the Margin of Error? 168
7.9 Estimating a Proportion 169
7.10 Sample Size for Proportions 171
7.11 Tests of Hypotheses 171
7.12 Case Study: Advertising Awareness 174
7.13 Chapter Summary 175
7.14 Exercises 176

8 Regression Analysis 181
8.1 Introduction 181
8.2 Relationships between Variables 188
8.3 Regression Analysis 189
8.4 Least Squares Method 191
8.5 Strength of the Relationship 196
8.6 Analysing the Residuals 199
8.7 Unusual Observations 203
8.8 Prediction from Regression 204
8.9 Margin of Error 205
8.10 Case Study: Wine Production 208
8.11 Chapter Summary 210
8.12 Exercises 211

9 Multiple Regression 219
9.1 Introduction 219
9.2 Multiple R^2 220
9.3 Multiple Regression 221
9.4 Polynomial Regression 227
9.5 Using Dummy Variables 231

9.6 Variable Selection and Model Building 233
9.7 Case Study: Autoparts Ltd. 234
9.8 Chapter Summary 238
9.9 Exercises 238

10 Forecasting 249
10.1 Introduction 249
10.2 Time Series 251
10.3 Estimating the Level 254
10.4 Forecasting with a Trend 259
10.5 Including Seasonality 263
10.6 Residual Analysis 268
10.7 Forecasting Accuracy 268
10.8 Case Study: Pine Products 270
10.9 Case Study: Asian Tourism in New Zealand 273
10.10 Chapter Summary 277
10.11 Exercises 277

11 Statistical Process Control 287
11.1 Introduction 287
11.2 Processes 288
11.3 Benefits of Reducing Variation 290
11.4 Common Cause Highway 294
11.5 The 85/15 Rule 297
11.6 Stability and Predictability 298
11.7 Process Adjustment 298
11.8 Chapter Summary 305
11.9 Data for the Dice Experiment 305
11.10 Data for the Quincunx Experiment 305
11.11 Exercises 306

12 Control Charts 309
12.1 Introduction 309
12.2 Three Sigma Limits 310
12.3 Special Cause Patterns 311
12.4 Variables Control Charts 312
12.5 The Individuals Chart 313
12.6 *R* and *X*-Bar Charts 315
12.7 Attribute Charts 321
12.8 Monitoring the Process 324
12.9 Sensitivity of Control Charts 326
12.10 Implementing Statistical Process Control 326
12.11 Case Study: Mike's Orange Company Ltd. 327
12.12 Chapter Summary 329
12.13 Exercises 329

13 Improvement Strategies 337
13.1 Introduction 337
13.2 Improvement Strategies 337
13.3 Special Cause Strategies 339
13.4 Common Cause Strategies 340
13.5 Specifications 342
13.6 Process Capability 346
13.7 Case Study: The Helicopter Experiment 349
13.8 Case Study: Cape Corp Debt Collection Agency 354
13.9 Chapter Summary 356
13.10 Data for the Helicopter Experiment 356
13.11 Exercises 356

Postscript 367
Decisions Based on Data 367
Thinking Statistically: The Key Principles 368
What We Have Not Done 371
Statistical Computing 372

Appendix: Statistical Tables 375
A.1 Normal Distribution 376
A.2 Percentage Points of the Normal Distribution 377
A.3 Percentage Points of the *t*-Distribution 378
A.4 Percentage Points of the χ^2-Distribution 379
A.5 Random Numbers 380
A.6 Constants for Control Charts 381

Bibliography and Further Reading 383
