Preface .....	xi
Acknowledgments .....	xv
Author .....	xvii
<b>1 Introduction .....</b>	<b>1</b>
1.1 Marginal Rate of Return and the Malthusian Trap .....	2
1.1.1 Marginal Rate of Return .....	2
1.1.2 Cuckoo Effect .....	4
1.2 Demand-side Cost Drivers .....	5
1.2.1 Old Normal .....	5
1.2.2 Old Normal of Clinical Medicine .....	5
1.2.3 New Normal .....	6
1.2.4 Collateral Damage and Unintended Consequences .....	7
1.3 Supply-side Cost Drivers .....	8
1.4 Demand–Supply Imbalance .....	8
1.4.1 Failures of Reliability .....	9
1.4.2 Overcare and Undercare .....	9
1.4.3 Primary Care Comes Second .....	10
1.4.4 Quality of Death .....	10
1.4.5 Craft and Mass Production .....	11
1.4.6 Back to the Future .....	12
1.5 What to Do? .....	12
1.5.1 Keep Spending .....	12
1.5.2 Freeze Spending .....	13
1.5.3 Government Power .....	13
1.5.4 Market Forces .....	15
1.6 Mission of This Book .....	16
1.6.1 Health Systems Science .....	17
1.6.2 Healthcare Is Not One .....	17
1.7 Organization of This Book .....	19
Notes .....	20

<b>2</b>	<b>The Logic of Purposeful Action in the Artificial World.....</b>	<b>23</b>
2.1	Logic and Sensemaking .....	23
2.1.1	Chunks of Logic and Variability .....	24
2.1.2	Articulated Logic .....	25
2.1.3	Chunks of Logic Build Intuition.....	27
2.2	Artificial World .....	27
2.2.1	Sectors of Science .....	28
2.2.2	Structures of the Artificial World.....	30
2.2.3	System Layers and Logics.....	33
2.2.4	Social Logic .....	35
2.2.5	Technical Logic.....	38
2.2.6	Economic Logic .....	44
2.2.7	Layers and Multiverse .....	46
2.3	Purposeful Action and Its Constraints.....	48
2.3.1	Causes and Purposes.....	49
2.3.2	Variability and Decay.....	50
2.3.3	Know, Can, Want .....	51
2.3.4	Demand and Supply .....	52
	Notes .....	53
<b>3</b>	<b>The Logic of Production .....</b>	<b>57</b>
3.1	Production Function and Types of Transformations.....	57
3.2	Product Technology: Differentiation, Variety, and Integration .....	59
3.2.1	Differentiation and Price.....	59
3.2.2	Product Attributes.....	59
3.2.3	Integration .....	60
3.2.4	Product Variety .....	60
3.2.5	Industrial Quality .....	60
3.3	Production Systems .....	61
3.3.1	Specialization and Coordination.....	61
3.3.2	Production Processes as Coordination Devices .....	63
3.3.3	Process Elements and Functioning.....	64
3.3.4	Process Measurements.....	70
3.3.5	Process Architectures .....	72
3.4	Production Dynamics and Management .....	78
3.4.1	Productivity .....	78
3.4.2	Variability and Quality Control .....	79
3.4.3	Inventory and Buffers.....	84
3.4.4	Setup and Handover .....	88
3.4.5	Production Process and Value Chain .....	89
3.5	Volume, Variety, and Cost.....	91
3.5.1	Economies of Scale .....	91
3.5.2	Volume and Variety .....	93

3.6	The Logic of Transactions and the Business Model .....	98
3.6.1	Business Model Canvas.....	98
3.6.2	Value and Exchange.....	99
3.6.3	Segmentation and Customer Relations .....	101
3.6.4	Customer Channels and Distribution .....	102
	Notes .....	104
<b>4</b>	<b>The Logic of Services .....</b>	<b>107</b>
4.1	Immaterial Utility and Integrated Resources .....	107
4.1.1	Services as Immaterial Utility .....	107
4.1.2	Services as Involvement.....	109
4.1.3	Services as Resource Integration.....	110
4.2	Production Function: Transformations in Services .....	112
4.2.1	Service Is State Change.....	112
4.2.2	Differentiation and Variety in Services.....	115
4.3	Service Production Systems .....	117
4.3.1	Variability in Services.....	117
4.3.2	Service Setup .....	118
4.3.3	Service Handovers.....	125
4.3.4	Customer Journey .....	127
4.3.5	Open and Closed Systems.....	130
4.3.6	Capacity Management .....	131
4.4	Service Performance Measurement and Evaluation.....	133
4.4.1	Service Quality .....	133
4.4.2	Gaps, Handovers, and Risks .....	134
4.4.3	Service Productivity .....	136
4.5	Service Transactions .....	138
4.5.1	Service Customer .....	139
4.5.2	Service Revenue Models.....	141
4.5.3	Service Distribution and Time–Location Constraints .....	143
	Notes .....	144
<b>5</b>	<b>The Logic of Healthcare .....</b>	<b>147</b>
5.1	Purposes and Products of Healthcare .....	147
5.1.1	Health and Help .....	147
5.1.2	Ontology of Health.....	150
5.1.3	Epistemology of Health .....	154
5.2	Resources and Capabilities .....	156
5.2.1	Theory and Therapy .....	156
5.2.2	Production Function in Healthcare.....	157
5.3	Production Systems in Healthcare .....	162
5.3.1	Patient as Flow Unit.....	163
5.3.2	Diagnosis as Setup .....	165

5.3.3	Handovers.....	166
5.3.4	Patient in Inventory .....	167
5.3.5	Output and Outcome .....	171
5.3.6	Process Architectures .....	176
5.4	Performance Measurement and Evaluation in Healthcare .....	177
5.4.1	Output Measurement.....	178
5.4.2	Output Evaluation .....	178
5.4.3	Outcome Measurement.....	184
5.4.4	Outcome Evaluation .....	185
5.5	Risk and Uncertainty in Healthcare .....	187
5.5.1	Quality in Healthcare .....	188
5.6	Volume–Variety in Healthcare .....	190
5.6.1	Economies of Scale .....	191
5.6.2	Affordable Care to the Masses.....	192
5.7	Healthcare Transactions .....	192
5.7.1	Healing Relationship .....	192
5.7.2	Patient–Doctor: The Commercial Relationship.....	193
5.7.3	Health Finance: Third-party Payers .....	196
5.7.4	Paying the Provider .....	202
5.8	Distribution in Healthcare .....	205
5.9	The Problem .....	207
	Notes .....	208
<b>6</b>	<b>The Demand and Supply–Based Operating Logic of Healthcare.....</b>	<b>213</b>
6.1	Segmentation beyond the Obvious .....	213
6.1.1	Overlapping Logics .....	213
6.1.2	Segmenting the Human Body.....	214
6.1.3	Segmenting Healthcare .....	216
6.2	Demand and Supply–based Operating Logic .....	220
6.2.1	The Healer Operates in Modes.....	220
6.2.2	Demand Side .....	222
6.2.3	Demand Meets Constrained Supply .....	225
6.3	Ontology of DSO .....	237
6.3.1	DSO as Setup, Design, and Architecture .....	238
6.3.2	DSO as Business Model.....	239
6.3.3	DSO as a Managerial Multiverse .....	245
6.3.4	DSO as a Managerial Platform with Clinical Apps.....	248
	Notes .....	250
<b>7</b>	<b>Summary, Conclusions, and Challenges .....</b>	<b>253</b>
7.1	Tools for Thinking.....	253

7.2	DSO Lens.....	255
7.2.1	Processes and Process Improvement .....	255
7.2.2	Patient Choice and Information Asymmetry .....	256
7.2.3	Professional, Administrative, and Consumerist Logics.....	256
7.2.4	Integration .....	257
7.2.5	Coordination and Time.....	257
7.2.6	Benchmarks .....	258
7.2.7	Volume, Variety, and Economies of Scale.....	259
7.2.8	Health Finance and Revenue Models.....	259
7.2.9	Heroic Medicine—and the Rest .....	260
7.3	Take It from Here.....	260
	Note.....	261
