<i>Preface</i>	<i>ix</i>
<i>Acknowledgments</i>	<i>xiii</i>
<i>About the Authors</i>	<i>xv</i>

PART ONE: Prepare

1. Thinking Like an Evaluator	3
Purchasing a Car: An Example of Evaluation in Everyday Life	4
Major Components of an Evaluation Process	6
Program Planning and Evaluation	11
Summary	12
References	12
2. Acquiring Requisite Knowledge and Skills	14
Roles of Evaluators	14
Evaluation Standards	16
Ethics and Human Subjects Protections	18
Evaluation Competencies	20
Communication and Negotiation	22
Building Partnerships and Capacity for Evaluation	24
Effective Partnerships and Collaborations	26
Inclusive Practice in Evaluation	26
Summary	30
References	30
3. Choosing an Evaluation Approach	33
Philosophical Perspectives that Influence Evaluation	33
Expertise-oriented Approaches	34
Consumer-oriented Approaches	35
Program-oriented Approaches	35
Decision-oriented Approaches	42
Participant-oriented Approaches	43

Systems Approaches	46
Approaches and the Evaluation Tree	46
Matching Approaches with Evaluation Questions	47
Examples of Integrated Approaches to Evaluation	49
Summary	50
References	50
4. Planning a Program Evaluation	53
Understanding the Evaluation's Context	54
Identifying and Engaging Stakeholders	56
A Program's Purpose, Goals, and Activities	59
Using Theory to Focus an Evaluation	61
Evaluability Assessment	66
An Evaluation's Purpose and Use	67
Evaluation Questions	69
Evaluation Proposals and Contracts	71
Summary	74
References	75
 PART TWO: Design	
5. Designing a Program Evaluation	79
Qualitative Designs	80
Case Study Designs	82
Quantitative Designs	83
Study Designs for Evaluating Contribution	90
Threats to Internal and External Validity in Quantitative Studies	91
Mixed Methods Designs	92
Complexity in Study Designs	93
Summary	94
References	95
6. Choosing Samples, Sampling Methods, and Data Sources	96
Data Sources and Units of Analysis	97
Sample Size, Selection, and Strategies	98
Defining Inclusion and Exclusion Criteria for Your Sample	102
Sampling Bias	103
Sample Size	104
Sampling Considerations in Relation to Study Designs	105
Strategies for Participant Recruitment and Retention	106
Ethical Practice	106
Sampling and Data Collection Plans and Protocols	108
Summary	109
References	109

PART THREE: Conduct

7. Collecting, Storing, and Tracking Information	113
What and Who Defines Credible Evidence?	114
Survey Design and Development	116
Psychometric Tests	120
Interviews and Focus Groups	123
Observations and Video-recordings	125
Checklists and Rubrics	126
Maps and Drawings	126
Photographs	129
Existing Sources	131
Capturing Accurate and Reliable Information	132
Designing Databases for Electronic Storage	133
Tracking Information	136
Summary	137
References	137
8. Analyzing and Interpreting Quantitative Data	139
Cleaning Data and Handling Missing Data	139
Matching Statistics to Quantitative Study Designs	142
Variables, Constants, and Levels of Measurement	143
Descriptive Statistics	145
Simple Plots	146
Statistical Assumptions	152
Evaluation Hypotheses	154
Sample Size, Power, and Effect Size	156
Aligning Statistical Analyses with Analytical Designs	159
Multivariate Analyses	161
Statistical Tests for Multiple Dependent Variables	163
Nonparametric Statistics	164
Reporting Statistics and Statistical Analysis	165
Working with Statisticians and Building Your Own Capacity	166
Summary	166
References	167
9. Analyzing and Interpreting Qualitative Data	169
Qualitative Thinking	169
Methodological Approaches and Analytical Strategies	170
Qualitative Approaches and How They Influence an Analysis	172
Ethical Issues in Qualitative Analysis	174
Preparing for the Analytical Process	174
Qualitative Analysis	175
Managing Data in Qualitative Analysis	182

Summarizing, Organizing, and Describing Qualitative Information	183
Summary	185
References	185

PART FOUR: Report and Prepare Again

10. Reporting and Disseminating Findings	189
Written Evaluation Reports	189
Brief Written Reports	197
Oral Presentations	198
Storytelling	199
Electronic and Social Media	199
Acting	200
Publications in Professional Journals	201
Summary	202
References	202
11. Preparing for Complexity in Evaluation	204
From Program Theory to Systems Theory	205
Simple, Complicated, and Complex Situations and Problems	206
Static, Dynamic, and Dynamical Change	207
Realistic Evaluation for Complicated Situations and Dynamic Change	208
Systems Thinking and Complexity	209
Developmental Evaluation	213
Social Justice and Inclusive Evaluation Practice	213
Preparing for the Future: Evaluation Skills for a Changing Field	220
Summary and Implications for Evaluation Practice	221
References	222

<i>Index</i>	225
